

KANGA-GUARD

Kangaroo Mesh Tree Guard...

20 per
pack

KANGA-GUARD provides protection for your saplings from foraging animals such as Kangaroos, Wallabies, Sheep and Deer.

Strong, long lasting & easy to install...

KANGA-GUARD mesh sheets are hot dip galvanised to provide you with a longer lasting guard that can be reused.

Each mesh sheet is 1200mm high x 1500mm wide, with 100mm x 50mm apertures. Assembled guard is approximately 460mm in diameter (475mm if not overlapped).

Easy to install, simply clip or tie the mesh sheet ends together to form a cylinder shape and stake with 2 x 1500mm high wooden or recycled plastic stakes, available from GROWISE.

Made from a heavier gauge wire that offers better protection from larger animals.

Saplings also less likely to blow over in stronger winds with opposing stakes for tying-in and additional support.

Stacks more per pallet

Flat mesh sheets make it easier and more cost-efficient to transport. Total of 600 mesh sheets or 30 packs per pallet.

KANGA-GUARD Specifications

- ✓ Delivered as 1200mm H x 1500mm W (pre-sized, flat galvanised mesh sheet) – no cutting required
- ✓ 100mm x 50mm apertures - larger apertures to make it easier for removal – branches will not be damaged as the guard is being removed
- ✓ Pre-packed flat in packs of 20 mesh sheets, 30 packs per pallet
- ✓ Hardwood stakes, pliers and fixing rings sold separately.
