

GREENGUARD-MIDI®

A naturally better tree guard...

GREENGUARD-MIDI® is a uniquely plastic-free, weather-resistant and biodegradable tree guard that provides an ideal replacement for plastic sleeve tree guards...

The true cost of tree guards...

Plastic Sleeve Tree Guards are time consuming to install, require three canes to anchor and often collapse in the field. Not to mention they can be an environmental hazard.

GREENGUARD-MIDI® provides a viable option to plastic sleeve guards...

- ☑ Half the time to install
- ☑ Holds shape well for life of guard
- ☑ Only requires 2 canes not 3
- ☑ No dumping cost, fully recyclable.

And best of all, GREENGUARD-MIDI® is plastic-free and biodegradable!

Made in Australia

GREENGUARD-MIDI® is proudly Australian designed and manufactured using Australian sustainable plantation pulp.

Stacks more per pallet

We've designed GREENGUARD-MIDI® with packing in mind. Our optimal design enables us to flat-pack 7,500 units per pallet to keep freight costs down.

GREENGUARD-MIDI® Specifications

- ☑ 350mm H x 150mm W (panels), square
- ☑ Plastic-free, proprietary weather resistant board
- ☑ Anchor with 2 x bamboo canes
- ☑ 12+ months field life
- ☑ Biodegradable & Recyclable.
